

PERMOCRISTAL 3

cartridge filter
for the individual home

APPLICATIONS :

PERMOCRISTAL 3 is an indispensable filter protecting all the water circuits in the home as well as all the household appliances, immersion heaters, water boilers, taps and mixers, cisterns and flushes, jet breakers, shower heads, etc. As time goes by, it will continue to offer every satisfaction in terms of clear and limpid water.

PRINCIPLE :

PERMOCRISTAL 3 is designed in three parts (head, bowl and attaching bush) so as to be easily removable.

Generally, it is connected to a bypass, below the water meter, by means of brass unions, tapped to 3/4" (20 x 27) or 1" (26 x 34). PERMOCRISTAL 3 will resist a maximum pressure of 8 bars and accept an instant flow rate of 1800 liters/hour. Its bowl is tinted against the action of UV rays. PERMOCRISTAL 3 houses a specific PERMO cartridge (sold separately) consisting of an interchangeable 20-micron sleeve and its support. Equipped in this way, it contains the physical impurities in the public distribution network and efficiently reduces problems of corrosion due to deposit of sand, marl or metallic oxides that build up at the low points of sanitary installations.

Cartridge for
PERMOCRISTAL 3 :
code : 3731.

Bowl/
disassembly key :
code : 3722

To replace the filter element
2 20 µ sleeves :
code : 3730.

PERMO, reserves the right to modify the models and specifications of its equipment without prior notice.
